SKILLS

HTML

CSS

JS JavaScript

ReactJS

Redux

Express

PostgreSQL

Sequelize

NodeJS

TypeScript

Next.js

Tailwind CSS

ENGLISH

B2 - Intermediate.

MILAGROS ROSALES

Full Stack Developer

ABOUT ME

Proactive full-stack developer, with a focus on front-end development. Actively seeking opportunities to enhance my skills and achieve professional success. I am known for being empathetic, resourceful, and creative in every project.

PROFESSIONAL EDUCATION

Full Stack Web Developer. Henry. 2022.

Online bootcamp with over 800 hours, centered on hands-on practices and real-world projects

Next.js on Udemy. Currently enrolled. Learning Next, the React framework for production.

EXPERIENCE

Front end developer. My Dashboard - November - Current.

My Dashboard is an admin dashboard, currently in the development phase. This platform utilizes an advanced set of technologies, including React.js, Next.js, TypeScript, Tailwind CSS, and Redux Toolkit.. [Code](#)

Front end developer. MSC (e-commerce) - August- November. 2023.

- I led the creation of a modern and functional interface for the MSC API project, utilizing React, Redux, Redux Toolkit, CSS, and Bootstrap.
- User-centered approach; implemented innovative solutions to enhance the platform's user experience and aesthetics.
- Achieved an elegant and attractive interface by applying design techniques and collaborating closely with the team to maintain consistency.
- Significantly contributed to usability by integrating Redux Toolkit for efficient application state management. [Code](#)

Full Stack Web Developer -Pokemon Api - May- July. 2023.

- Designed and developed a Single Page Application (SPA) using modern technologies such as React, Redux, and CSS modules for the Front End.
- I implemented a Back End developed in Node.js and Express.
- I integrated the external 'Poke API' to fetch real-time data about Pokémon, enhancing the user experience.
- I utilized Sequelize to interact with a PostgreSQL database, efficiently managing data related to Pokémon
- I implemented functionalities enabling users to search for Pokémon by name, create new Pokémon, filter by type, and sort alphabetically.
- Ensured optimal performance and a smooth user experience through database query optimization. [Code](#)

Full Stack Web Developer -Rick and Morty- January- March 2023.

- I led the development of an Integrative Project at Henry Bootcamp, creating a Single Page Application (SPA) with React and Redux for the Front End.
- I implemented components using CSS without relying on external libraries, ensuring a custom and efficient design.
- The SPA fetches data from 'The Rick and Morty API' through a Back-End developed in Node.js with Express.
- I implemented features that allow users to search for characters, filter by gender, sort alphabetically, and add characters to the favorites list.
- Ensured an intuitive and smooth user experience, prioritizing usability and efficiency in interacting with the platform. [Code](#)
