ABOUT ME

Proactive full-stack developer, with a focus on front-end development. Actively seeking opportunities to enhance my skills and achieve professional success. I am known for being empathetic, resourceful, and creative in every project.

PROFESSIONAL EDUCATION

Full Stack Web Developer. Henry. 2022.
Online bootcamp with over 800 hours, centered on hands-on practices and real-world projects

Next.js on Udemy. Currently enrolled. Learning Next, the React framework for production.

EXPERIENCE

Full Stack Web Programming course tutor.

Cluster Tecnologico Tandil. Present

Front end developer. My Dashboard.

My Dashboard is an admin dashboard, currently in the development phase. This platform utilizes an advanced set of technologies, including React.js, Next.js, TypeScript, Tailwind CSS, and Redux Toolkit.. Code

Front end developer. MSC (e-commerce).

- I led the creation of a modern and functional interface for the MSC API project, utilizing React, Redux, Redux Toolkit, CSS, and Bootstrap.
- User-centered approach; implemented innovative solutions to enhance the platform's user experience and aesthetics.
- Achieved an elegant and attractive interface by applying design techniques and collaborating closely with the team to maintain consistency.
- Significantly contributed to usability by integrating Redux Toolkit for efficient application state management. Code

Full Stack Web Developer. Pokemon Api.

- Designed and developed a Single Page Application (SPA) using modern technologies such as React, Redux, and CSS modules for the Front End.
- I implemented a Back End developed in Node.js and Express.
- I integrated the external 'Poke API' to fetch real-time data about Pokémon, enhancing the user experience.
- I utilized Sequelize to interact with a PostgreSQL database, efficiently managing data related to Pokémon
- I implemented functionalities enabling users to search for Pokémon by name, create new Pokémon, filter by type, and sort alphabetically.
- Ensured optimal performance and a smooth user experience through database query optimization. Code
